- High grade aluminum, which Hot Products has extensively tested for the manufacturing of these handlebars.
- Lightweight, super-strength, durable and excellent vibration dampening for freestyle and rough surf riders.
- The handlebar surface has been shot peened to help assist in preventing fatigue or failure.

Stand-Up Performance Handlebars	Color	Part No.
Yamaha/Kawasaki Zero degree	Silver	HJF-00

Runabout Handlebars	Black	HJR-01BK

UNIVERSAL FAT BAR ADAPTERS

Hot Products has designed these billet adapters to be compatible with UMI steering and other manufacturing steering systems and allows for use of "Fat Bars" for that added strength and clamping pressure needed for today's high performance applications. Both the one piece kit and two piece set come laser etched with the Hot Products logo.

Description	Part No.
One Piece Billet Adapter Kit	HJCL-01
Two Piece Billet Adapter Set	HJCL-02

- Knurling – Grip end only – increases bonding between the handlebars and the grips.
- Anodized finish forms an integral coating giving protection against corrosion.
- A Hot Products crossbar pad is included with every handlebar.

• All Hot Products Handlebars feature scale lines for easy installation and alignment to each riders specifications.

WATERCRAFT WERKS KAWASAKI 750SX/SXI HANDLEPOLE SPRING TENSIONER

The Watercraft Werks Spring Tensioner adds preload to the handlepole which reduces the handlepole weight. The lighter handlepole reduces back, shoulder and arm fatigue. The stainless steel constructed shim installs in less than 5 minutes with basic tools.

R&D AUTO DROP NOZZLE KITS

The R&D VTS/Auto Drop Nozzle is the first manually activated VTS nozzle with Auto Drop functions! When riding with the VTS adjusted in the neutral position the nozzle will drop 5 degrees in the turns allowing for a much smoother high speed turn to be made. When the steering reaches the straight position the nozzle returns back to the straight position. When riding with a full tank the best VTS setting is usually in the click up position and stays there.

With the R&D VTS Nozzle Kit you can ride 1 click up (5 degrees up) and when you turn the nozzle will drop 5 degrees which is back to zero or straight position. When steering returns back to straight the nozzle resumes the one click up (5 degrees up) position.

Sea-Doo RXP

The R&D RXP Auto Trim Kit was developed to override the OEM VTS System with a fully adjustable and fully automatic trim system! The R&D Auto Trim automatically drops a rider preferred adjustable 2-8 degrees. Drive from turn to turn never worrying whether the trim is in the best position for perfect turn negotiation! For long straight rides install the R&D VTS/Holeshot Driver Rod

(Pt.# 163-21503), which works in conjunction with the R&D Auto Trim to electronically override the Auto Trim back to the OEM VTS Nozzle angle trim settings!

EZ-TRIM SYSTEM (THE ORIGINAL)

Easy-Trim System was designed to allow riders of all levels to get a fair amount of trim with a light pull on the lever. The system will give you 30-35 degrees of trim. The system is constructed of anodized billet aluminum for strength and light weight. It can be changed into the

straight pull with a few additional accessories. This system is available for Yamaha Superjet or similar pump setups.

Kit includes: trim ring, cable, lever, hardware, reduction nozzle and steering nozzle. It is recommended that you purchase a through hull tube if your PWC is not equipped for a clean and easy installation.

RRP NINJA PUMP FLOW GUARD

This innovative Pump Flow Guard from RRP/Ninja helps to increase performance and to gain more height for aerial maneuvers. It allows for full functionality of the steering nozzle and trim system.

- Prevents the water flow from the outside of the pump entering between the restriction and steering nozzles, breaking the flow water inside the pump.
- Prevents back spray when turning the steering nozzle, and loss of internal pump pressure.
- Stops the pumps spraying into the exhaust, which causes engine bog on acceleration during turns and maneuvers.

UMI BILLET FINGER THROTTLE

Lever perch is machined at an angle which makes the lever pull at a downward sloping angle. This motion keeps the lever at the tip of your finger throughout the throttle range greatly reducing arm pump and providing superb throttle control. Also available in traditional straight pull. Teflon bushings eliminate the play common in other throttles and provides a smoother throttle pull. Stainless steel pin and C-Clip eliminates corrosion at hinge point. Available for all models. Also available in anodized black. Some models require throttle cable adapter.
