## JETTRIBE LEG GUARD RIDING GEAR

Unlike the hard and heavy leg guards used by many runabout racers today, Jettribe's innovative 2011 Leg Deflectors offer the very best in leg protection while maintaining flexibility, durability and weight savings. Infused with years of technology, Jettribe's dual-panel leg guards are made with two corrugated- honeycomb poly carbonate cells laminated together covering both the front and outside of the shin. Then, each protective cell is wrapped in ballistic nylon, four-layers of protective compression-molded EVA open-cell foam and an air mesh layer over the 6mm molded-neoprene outer covering. Simply put, Jettribe's 2010 Leg Deflectors can absorb impact and redistribute the force throughout the protective cells reducing impact to the rider. Strap the triple 1-1/4 inch Velcro straps around your calf and above your knee and you're ready to ride! Each pair of Jettribe's 2010 Leg Protectors come with a convenient reusable carrying case and the industry's leading limited one-year customer satisfaction warranty – found on all Jettribe performance products.

## PRO MODEL RESCUE SLED

US Utility Patent 5,354,222 and  
other patents pending.

*Used by top watermen  
and Rescue Professionals  
for 20 years!*

The Extractor PRO model has been an industry standard for quick rescue pickups in the surfline, rivers and other near shore situations. This model, due to its size and weight, is designed for use with pwcs where a single rescue operator is available to operate the pwc, or may be used in situations where a rescue swimmer is used to assist the victim.

Used by surfers around the world, the tapered tail makes it very easy to paddle up on the deck of the sled, for those doing step-offs or tow-at surfing. The tapered tail also makes it easier to place unconscious, handicapped, or incapacitated victims onto the deck of the sled.

Recommended for three-seater pwcs for all types of waterborne rescue operations or recreational activities, including tow-in surfing.

**Molded Linear Low Density Polyethylene shell** (Highly U.V. Resistant from degradation or color fade, will not become brittle or fade from sun exposure like ABS plastic skins and polyethylene foam skins, exceptional rebound and tensile strength-will not crack, high flexural modulus, maintains overall shape, physical properties and will not warp under normal operating climate conditions, resistant to all chemicals. Monolithic molded part without laminated skins. Will not delaminate from water invasion at the seams. Easy to mend with plastic welder, resistant to folding or creasing under manufacturer recommended use guidelines.

- Length: 63 in. (160 cm) • Width: 38in. (96.5cm)
- Thickness: 3.85 in. (10cm) at thickest point, Tail is tapered at 2.5 in. (6.75 cm) thick so that the sled will not have too much flotation, and will sink a few inches under water while the pwc is at idle.
- Capacity: 400lbs.(180 kg) or two adults.
- Pro Sled Weight: is approximately 45 lbs (20 kg)
- Tie Down version is standard
- 3/8" thick PVC Foam Deck Pad - Very Comfortable (Durable and provides the right amount of traction. Non-slippery like the polyethylene bodyboard foams or non textured PVC foams. Non-Abrasive and will not create skin rashes like textured medium density EVA Trac-Top type foams)
- 8 Handgrips Standard or 10 Handgrips (Last Chance Handgrips as an option) Made from 5000lb test nylon webbing, overmolded with proprietary, flexible elastomers, very durable and resistant to the elements. Handgrips are anchored to the sled hull using 7000lb test brass mold-in inserts and stainless fasteners. Fasteners are secured from backing out using Lock-tite. You will not find a more comfortable secure-feeling handgrip!
- Vibration Issues- The PRO Extraction Sled utilizes flexible linear low density polyethylene, flexible urethanes or EVA copolymers as bumpers at the connecting points, and a cushioning deckpad. All of these items have been used to reduce vibration caused from pwc motors.

Description	Part No.
Pro Model Rescue Sled*	XPROTD

## MEGA MODEL PWC SLED

- Recommended for three seater pwcs where more room is needed for passengers, for SCUBA, for spearfishing, for tow boards, or for hauling lots of equipment.

- Rotomolded Polyethylene Hull, with molded polyethylene flotation foam inner liner (3/8" to 1/2 inch thick for stiffness and added flotation), hollow air cavity..

- Length: 84 in. (206cm) • Width: 42 in.(104cm)
- Max Thickness: 5.5 in. (14 cm) • Weight: is approximately 70lb.
- Capacity: three people or 600lbs. (270kg)

- Available in Quick Hitch, Basic Tie Down or Intermediate Tie Down/Direct Connect Versions

- 3/8" thick PVC Foam Deck Pad-Very Comfortable (Durable and provides the right amount of traction. Non-slippery like the polyethylene bodyboard foams or non textured PVC foams. Will not create skin rashes like textured medium density EVA Trac-Top foams)
- EVA foam rail bumper pads available
- 8 or 10 or 12 Handgrips (Last Chance Handgrips as an option)
- Vent/Drain Plug
- Cargo Webbing Loops Built into handles provide attachment points for bungee lashing, cargo straps or rope grab lanyards. These are great for securing surfboards, equipment, fishing gear, coolers, or fish kill bags.
- Hull Rocker and Rail configuration designed to provide maximum sled contact with water surface and perform well behind a pwc. The "Gooseneck nose or bow (patent pending), also relieves stress at the fulcrum point where sled nose rests on pwc transom. Air pockets or phasers on hull bottom provide hull strength and stiffness as well lift and less contact with water surface. This combined with channels in hull direct water flow off of sled tail rapidly. The result is a sled that creates less drag, tracks better without fish-tailing, provides more traction through tighter turns without the pwc sliding out, and higher pwc top speeds.
- Hand Grip/bumper Colors: Red, Black or Yellow

\*Guaranteed to outlast any other pwc sled available in the world, provided use and maintenance guidelines adhered to.

## LIFESLED FOR PWC RESCUE

Lifeguards and public safety agencies around the world are embracing an innovative rescue system that already has saved hundreds of lives, and promises to save thousands more in extreme rough water situations such as ocean storms, heavy surf, rip currents, flooding rivers and other life-threatening situations.

**Non-Invasive hookup conveniently attaches LIFESLED to most any PWC without cumbersome rigging or drilling holes.**

- ◆ LIFESLED is highly maneuverable. It barely affects low-speed motoring and increases the overall stability of the craft. There is no chance of windmilling or dumping of victim.
- ◆ Bullet-nose allows 45° fish-tail pivot off the PWC transom.
- ◆ 70/30 rails allow sufficient tracking for stability, and still allow the driver to 'break loose' for quick turns.
- ◆ Inexpensive, replaceable nose-guard protects the nose of the sled and the PWC transom.
- ◆ Overall size is sufficient for two adults yet still highly maneuverable. Weighs only 35 lbs.
- ◆ The Swallow-tail design enables easy victim centering when mounting in the water.
- ◆ Hook-up design allows the sled to be folded over the PWC when not in use.
