Tau Ceti's new Pro Series II Flame Arrestors are constructed from top quality materials such as aircraft grade aluminum, stainless steel, and a superior quality rubber base. This Flame Arrestor is designed with both duration and superior performance in mind. Using an extremely light anodized aluminum top in Silver, Black, Blue, Green and Red and a stainless steel mesh, this product is 100% corrosion resistant. With our free flowing, stainless steel mesh, we achieved an increase in acceleration and a much better throttle response. The universal rubber mount will fit any personal watercraft with a stock carburetor using the appropriate adapter. No re-jetting is necessary on stock boats.

<b>Description</b>	<b>Part No.</b>
