## **DOC ALLEN'S VERSATOOL**

Versatool is a compact tool kit developed to be immediately available for use. The simple stainless steel handle with sliding adapter can be used with all types of 1/4" hex bits (slots, allen, phillips, etc.) as well as all 1/4" sockets.

The uniqueness of the versatool is the sliding adapter on the loop handle, which allows the tool to be used as a screwdriver or socket wrench with variable leverage. A water-resistant wallet-sized pouch with belt loop is provided to store the tool and accessories. There are 11 assorted screwdriver bits with holder, extension shaft, and 1/4" adapter included in the kit.
